EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

In claims 2 and 4: line 2, after "that", -- are -- has been inserted.

Fully amended texts are given below:

Claim 2. (currently amended) The optical device of claim 1, wherein a plurality of output lights of the light that are outputted from the light output ports have the same intensities.

Claim 4. (currently amended) The optical device of claim 3, wherein a plurality of output lights of the light that are outputted from the light output ports have the same intensities.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Mattia, the best reference of record. The optical device of Mattia is an integrated photonic transistor composed of a plurality of photonic transistors connected in series, each transistor having two input ports (one for control signal path and the other for input signal path) and **an output port** (for output signal path) with the output port of the first transistor

being used as one input port of the two input ports of the second transistor, and so on.

In this device, some photosensitive rods are disposed at the intersection of the optical signal paths **for tuning the signal generated by the device at the output port.**

Contrary to the device of the Mattia, the device of the present invention has a plurality of input ports and **a plurality of output ports**, each having an optical path. A defect rod (not a photosensitive rod) is disposed at the intersection point of at least two optical paths (one input path and one output path). The general concept of the present invention **is to equalize the power at the two output ports.** In view of this difference, it is to be concluded that the two inventions contain divergent subject matters.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Loha Ben whose telephone number is (571) 272-2323. The examiner can normally be reached on Monday to Saturday, generally between 12:00 noon and 8:00 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y. Epps, can be reached on Monday to Friday, at (571) 272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
